IDENTIFIERS	*Mammals

ABSTRACT

In this videotape, students learn more about the characteristics of common warm-blooded mammals and what makes them different from other animals. Children also find out how humans are more advanced in structure than other mammals, but how they still share the same basic traits. This videotape correlates to the following National Science Education Standards for Life Science: characteristics of organisms; life cycles of organisms; and organisms and environments. The videotape is accompanied by a teacher's guide and a hands-on student experiment. (CCM)
